Since 01- November-2020, it has been my pleasure to work with Belal and I was his direct supervisor. He worked as a Translator. He was an important asset to this contract that supported the National Maintenance Strategy here with the Afghan National Army 111th Division in Kabul Pol-e-Charkhi.

During the time that I have worked with Belal, he has served the entire team with a willing spirit. His motivation and willingness to serve is evident in everything he does. His computer skills are unique especially in programming and coding, he is eager to study and improve his skills.

Since Belal's service in support of the US Military and NMS/GVS contract in Afghanistan, he has suffered threats to himself and his family's life which he supports from his income.

He worked for the ANA 111th Division in Kabul. Nothing can guarantee his security as he goes to work every day from his place of residence. Currently, the city he lived in is burnt and attacked by TALIBAN and he escaped from that situation and living in Kabul.

With decades of war and instability in Afghanistan, life is very difficult with many challenges during this time. He faces security and life challenges from being unable to get away from these disasters.

So, regarding all these sensible reasons it is obviously not safe for him or his family.

Due to his involvement with United States' efforts, this could possibly pose a threat to Belal's continued existence in Afghanistan. For these reasons, I would recommend Belal's consideration for Chief of Missions (COM) approval.

- Mr. Belal Noory is faithful and has done valuable services throughout his employment.
- He has never shown any threat during his employment with this company and NMS-GVS contract
- It is my opinion that Belal poses no threat to the national security or safety of USA.
